6.1.50. Table: darts.user_account

migration columns all sourced directly from dm_user_s, but only for rows where r_is_group = 0

Columns

		Name	Data type	Description / Attributes
▤	🔑	usr_id	integer	primary key of user_account
▤		dm_user_s_object_id	character varying(16)	internal Documentum primary key from dm_user_s **Nullable**
▤		user_name	character varying	
▤		user_email_address	character varying	**Nullable**
▤		description	character varying	**Nullable**
▤		is_active	boolean	
▤		last_login_ts	timestamp with time zone	**Nullable**
▤		is_system_user	boolean	
▤		account_guid	character varying	**Nullable**
▤		created_ts	timestamp with time zone	
▤		created_by	integer	
▤		last_modified_ts	timestamp with time zone	
▤		last_modified_by	integer
